

Receive proactive monitoring and remediation while minimizing disruption and downtime utilizing *Smart OOB* out-of-band management with Failover to Cellular, even during outages.

The Opengear IM7200 is a state of the art infrastructure management solution which streamlines management of network, power and server infrastructure in data center and remote environments, ensuring business continuity and increasing network resilience.

Key Management Features

- Comprehensive out-of-band with *Smart OOB*
- Strong security and authentication
- Zero Touch Provisioning (ZTP)
- Vendor-neutral power management
- Infrastructure management that scales

Infrastructure Management Benefits

- **Minimize MTTR and increase MTBF.** Proactive problem identification, quick notification and automated remediation reduce operating and downtime costs.
- **Ensure uninterrupted availability.** Transparent automatic fail-over and always-on *Smart OOB* access keep the business up and running.
- **Understand everything that affects uptime.** Monitor and control virtually everything, including the physical environment, prevent disruptions.
- **Increase efficiency and reduce human error.** Equip every rack with virtual remote hands in lights-out data centers and colocation cages.
- **Leverage existing tools and work flow.** Integrates with standard management tools and existing infrastructure.
