

DYNAMIC FACILITY MAINTENANCE: Increasing the longevity of your equipment

In these trying times, we have witnessed capital expenditures being cut. Therefore it is becoming critical to increase the longevity of your equipment with preventative maintenance. Here are ways JEM can help.

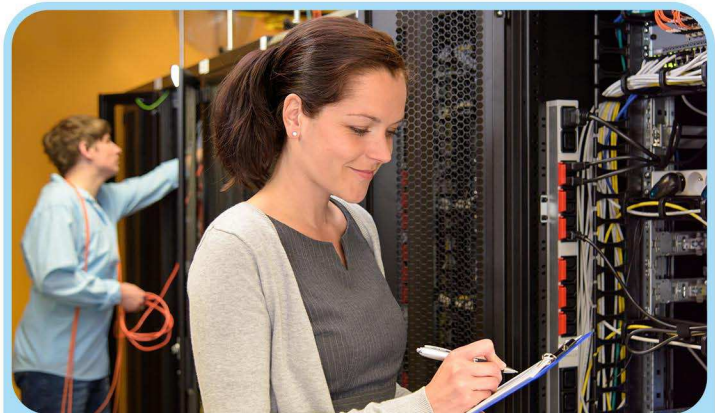

Cleaning & Repair of data centers and telecommunications closets.

3rd Party Maintenance of your hardware in order to keep your business functioning day to day.

Environmental Assessments of overall mission critical spaces focusing on room design, power, cooling, rack layouts and more.

Risk Assessments of your critical spaces to identify unseen issues and prioritize solutions in order to mitigate risk of downtime.
