For nearly 50 years, JEM Tech Group has aspired to build long-lasting relationships within the IT community. Our goal is to help you achieve full optimization of your mission critical infrastructure in IT-intensive spaces such as data centers, edge and cloud locations, telecommunication closets, branch offices, remote sites, and command and control centers. The core of our products and services portfolio concentrates on maintenance and manageability of the IT power and cooling infrastructure. Each project is unique therefore, you can depend on us to listen, understand and provide vendor neutral solutions in order to maintain up-time and efficiency of their valuable IT assets. Our consultative approach effectively bridges the gap between Facilities, IT departments and Procurement within any organization.
